### Treatment

---

KC given IN. DHP/L4 given SC neck.

### Recommendations

#### Healthy animal

---

- Next L4 in 4 weeks.
- Keep brushing Murphy's teeth - sight hounds are prone to fast tartar build-up. You can also encourage longer lasting chews like antlers, Nylabones.
- We discussed diet. We advise against raw diet due to risk of zoonotic disease. If you continue with raw feeding, please practice safe food handling and ensure immunosuppressed individuals are not exposed, including children. If you're interested in other options: Many of our whippet owners seem to love Butternut Box. Vet Chef is a great resource if you are keen to cook for Murphy.

#### Advocate Dog Large (10-25kg)

---

Apply one pipette to the skin on the back of the neck monthly
